SUMMARY

Breadth-first, end-to-end app developer. Most proficient in Python, Django and Vue, but always learning new tech stacks and open to work in most web frameworks or anything Python.

SKILLS

Languages: Python, JavaScript, HTML, CSS, SQL, C++.

Frameworks: Django, Vue, Django Rest Framework, Flask, FastAPI, React, Nuxt.js, Next.js.

Technologies and Tools: Git, Docker, OpenCV, PostgreSQL, Figma, Arduino.

PROJECTS

Django, Vue, DRF, webpack, Postgresql Amazon S3 Stripe

Fully-fledged fullstack store / Kalopsia   github link - live site

Built with Django as a full-stack framework serving static Vue files for additional level of interactivity guaranteed by the SPA architecture, communicating with Django both directly and through a REST-style API, while utilizing Django's built-in account and security features. Also includes Stripe and Twilio SendGrid service handling.

Django, Vue DRF, Postgresql Markdown OpenAPI

Account-based fullstack separate domain Blog   github link - live site 1 - live site 2

Account-based blog with multi-image markdown post creation, tag definitons, comments with replies, including sorting and filtering by data-based criteria. Entirely separate backend and frontend app, communicating through a REST-style API.

React, Redux Supabase

Rate Your Stuff / React social platform   github link - live site

Built with React and modern React libraries (Redux, Router) supported by a Supabase hosted Postgresql database and authentication system. Includes posting, commenting, filtering and account functionalities through CRUD operations.

Django, HTMX Amazon S3 Bootstrap

Fullstack Django Instagram clone   github link - live site

Instagram clone featuring infinite scroll, account, follow, like, comment and post filter models and functionalities, supported by HTMX for in-place partial refreshing

Django, Docker, Pytest Github Actions

Django Forum / Technology tester   github link

Account-based forum app with posts within threads within topic-based boards, dockerized with a Postgresql database, Unittest and Pytest coverage, bootstrap styling and basic CI tools integration

EDUCATION

3/2021 - 9/2022   **Automation Theory and Robot Control [M.Sc.]**   **Lodz University of Technology**

Thesis: Remote control of a mechanical hand with haptic feedback - C++, Arduino, Unity, websockets, lenghty state-of-art research section

9/2017 - 2/2021   **Automation and Robot Control [B.Sc.]**   **Lodz University of Technology**

Hardware implementation of selected Rubik's cube arranging algorithm with the use of visual information - EmguCV (C# OpenCV equivalent), Arduino

EXTRA

Education   **Notable School Projects**   **Lodz University of Technology**

· OpenCV object 3D-space localization using Zhang's method
· BLE triangulation-based user localization app with focus on accessibility (research and planning)
· Guitar effect with circuit simulation and a functional prototype

Student Club   **SKN Kosmos**   **Lodz University of Technology**

Worked on creating arduino-controlled model rockets and integrating new members into the club

EDUCATION

08/2021 - 10/2021   **Intern**   **Ergom**

Introduced to every department's workflow and tools, cable electrical resistance testing

LANGUAGES

English - C1 certified, **Polish** - native, **Spanish** - A1+
